

Solution Operator

Company Information

Wesdome Gold Mines has had over 30 years of continuous gold mining operations in Canada. The Company is 100% Canadian focused with a pipeline of projects in various stages of development. The Company's strategy is to build Canada's next intermediate gold producer, producing 200,000+ ounces from two mines in Ontario and Quebec. The Eagle River Complex in Wawa, Ontario is currently producing gold from the Eagle River Underground Mine. Wesdome is actively exploring its brownfields asset, the Kiena Complex in Val d'Or, Quebec. The Kiena Complex is a fully permitted former mine with a 930-metre shaft and 2,000 tonne-per-day mill. The Company trades on the Toronto Stock Exchange under the symbol "WDO".

Summary

- The solution operator is responsible for operating the mill circuit from the leach tanks to the precipitation, work in direct communication with tailings filter operator.
- Complies with safety regulations and uses required personal protection equipment.
- Provides hands on training for new operators.
- Works directly with other operators to ensure a smooth and efficient operation.
- Works with maintenance personnel to provide access for maintenance of equipment.
- Works with the Metallurgist to solve problems and get the best recovery.
- Reporting To: Mill Shift Foreman

Responsibilities / Job Duties Performed
